Marc Abi Zeid Daou

Abizeiddaou.m@northeastern.edu | GitHub | LinkedIn | Portfolio | (617) 937-9799 | Boston, MA

EDUCATION

Northeastern University | *Boston, MA* *Expected May 2028*
Master of Science in Data Analytics Engineering
Relevant Coursework: *Computation and Visualization, Foundations in Data Analytics*

University of Massachusetts Boston *May 2026*
Bachelor of Science in Computer Science
GPA: 3.9/4.0 | ***Honors****: Dean's List, Paul English Scholarship, MathWorks Scholar*

SKILLS

- **Programming:** Python, Java, C, SQL, R, JavaScript
- **Frameworks & Libraries:** Django, React, Node.js, Pandas, NumPy, Scikit-learn, Seaborn, Streamlit, Plotly
- **Databases:** PostgreSQL, SQLite, MongoDB
- **Cloud & Development:** Azure, Render, Docker, Git, GitHub, Linux, Jupyter
- **Data Visualization & Analytics:** Power BI, Tableau, Datawrapper, Flourish, Excel
- **Languages:** Arabic (native), French (fluent)

WORK EXPERIENCE

Pulpdent Corporation – Software Engineering Intern | *Watertown, MA* *Jun. 2025 – Sep. 2025*

- Developed a Python-based AI agent that extracted 4 key fields from raw-material PDFs and generated MDR draft descriptions in Word, reducing manual document preparation for the regulatory team
- Automated batch PDF processing, Word document generation, and consolidated reporting using Azure services, and developed a PubMed research assistant; **the company used the overall prototype as the foundation for its final solution**

Pulpdent Corporation – Logistics Intern | *Watertown, MA* *Jun. 2024 – Aug. 2024*

- Processed orders and billing records while coordinating picking, packing, and shipment preparation
- Supported shipping, inventory, and regulatory operations by digitizing 10+ months of packing slips, tracking product measurements, and updating supplier certification and barcode records

PROJECTS

Job Market Analytics | https://github.com/marcazdaou/Job-Market-Analysis *Jan. 2026 – Jun. 2026*
Data Science / ML | Python, Pandas, Scikit-learn, Statsmodels, Streamlit, Plotly, Pytest | Live Demo

- Engineered an end-to-end Python data pipeline to clean 394,300 job postings from 6,295 companies in 65 countries, standardize 64,574 salaries, and classify titles into 19 job types
- Trained 4 regression models using leakage-safe cross-validation, achieving an R^2 of 0.77 for salary prediction, and used bootstrap confidence intervals and fixed-effects regression to measure pay gaps
- Developed and deployed an interactive Streamlit dashboard with a world map, role and skill explorers, and a salary predictor, backed by a 5-page research report and 49 automated tests

Green Thumb (E-Commerce Platform) | https://github.com/marcazdaou/Green-Thumb *Sep. 2025 – Mar. 2026*
Full-Stack & ML | Python, Django, PostgreSQL, Pandas, Scikit-learn, Plotly, Stripe | Live Demo

- Developed a full-stack Django e-commerce app on 1M+ real retail transactions with user authentication, server-side cart pricing, product reviews, Stripe test-mode checkout, and 76 automated tests
- Built ML models and an interactive Plotly dashboard: a repurchase predictor (ROC AUC 0.795, beating a recency baseline) and "bought together" recommendations that beat best-sellers on future orders
- Segmented 5,800+ customers with RFM and k-means, finding that 20% of customers drive 73% of revenue

ACADEMIC RESEARCH

Git Branching Workflows & Developer Productivity | *University of Massachusetts Boston*

- Analyzed 2 peer-reviewed studies covering 2,923 GitHub projects and synthesized findings on the relationship between Git branching strategies, developer collaboration, and productivity into a technical research paper
