# Marc Abi Zeid Daou

marcazdaou@gmail.com | GitHub | LinkedIn | Portfolio | (617) 937-9799 | Boston, MA

## EDUCATION

**Northeastern University** | *Boston, MA* *Expected May 2028*
*Master of Science in Data Analytics Engineering*
***Relevant Coursework:*** *Computation and Visualization, Foundations in Data Analytics*

**University of Massachusetts Boston** *May 2026*
*Bachelor of Science in Computer Science*
***GPA: 3.9/4.0*** | ***Honors****: Dean's List, Paul English Scholarship, MathWorks Scholar*

## SKILLS

- **Programming:** Python, Java, C, SQL, R, JavaScript
- **Frameworks & Libraries:** Django, React, Node.js, Pandas, NumPy, Scikit-learn, Seaborn, Streamlit, Plotly
- **Databases:** PostgreSQL, SQLite, MongoDB
- **Cloud & Development:** Render, Docker, Git, GitHub, Linux, Jupyter
- **Data Visualization & Analytics:** Power BI, Tableau, Datawrapper, Flourish, Excel
- **Languages:** Arabic (native), French (fluent)

## WORK EXPERIENCE

**Pulpdent Corporation – Software Engineering Intern** | *Watertown, MA* *Jun. 2025 – Sep. 2025*

- Developed a Python AI agent that extracted 4 key fields from raw-material PDFs and used the OpenAI API to draft MDR device descriptions in Word, cutting manual document prep for the regulatory team
- Automated batch PDF processing and consolidated summary-table reporting, and built a PubMed research assistant; **the prototype became the foundation for the company's final regulatory tool**

**Pulpdent Corporation – Logistics Intern** | *Watertown, MA* *Jun. 2024 – Aug. 2024*

- Processed orders and billing records while coordinating picking, packing, and shipment preparation
- Digitized 10+ months of packing slips and maintained product measurement, supplier certification, and barcode records in Macola ERP and Excel, supporting the shipping, inventory, and regulatory teams

## PROJECTS

**Job Market Analytics** | https://github.com/marcazdaou/Job-Market-Analysis *Jan. 2026 – Jun. 2026*
*Data Science / ML | Python, Pandas, Scikit-learn, Statsmodels, Streamlit, Plotly, Pytest* | Live Demo

- Engineered a Python pipeline that cleaned 394,300 job postings from 6,295 companies in 65 countries, standardized 64,574 salaries, and classified titles into 19 job types
- Compared 3 regression models against a baseline with leakage-safe cross-validation ($R^2$ 0.77) and used bootstrap confidence intervals and fixed-effects regression to measure real pay gaps
- Deployed a live Streamlit dashboard where job seekers and students can benchmark salaries, compare roles and countries, and find in-demand skills before applying or negotiating offers

**Green Thumb (E-Commerce Platform)** | https://github.com/marcazdaou/Green-Thumb *Sep. 2025 – Mar. 2026*
*Full-Stack & ML | Python, Django, PostgreSQL, Pandas, Scikit-learn, Plotly, Stripe* | Live Demo

- Built a full-stack Django e-commerce app on 1M+ real retail transactions with authentication, server-side cart pricing, reviews, Stripe test-mode checkout, and 76 automated tests
- Trained a repurchase predictor (ROC AUC 0.795, beating a recency baseline) and "bought together" recommendations that beat best-sellers, helping retailers target win-back and cross-sell campaigns
- Segmented 5,800+ customers with RFM and k-means and found that 20% of customers drive 73% of revenue, showing a store which customers to prioritize for loyalty offers

## ACADEMIC RESEARCH

**Git Branching Workflows & Developer Productivity** | *University of Massachusetts Boston* *Sep. 2025 – Mar. 2026*

- Analyzed 2 peer-reviewed studies covering 2,923 GitHub projects and synthesized findings on the relationship between Git branching strategies, developer collaboration, and productivity into a technical research paper
